Comments & Insights:

- Revenue Trend**
The company experienced significant growth from 2021 to 2023, with revenue increasing from 5.11Mkr in 2021 to 21.43Mkr in 2023. However, there's a sharp decline in 2024, with revenue dropping to 13.39Mkr. The trend continues downward in 2025, with only 1.01Mkr in revenue for the first few months.
- Customer Acquisition and Churn**
Customer acquisition was strong from 2021 to 2023, but the company started experiencing high churn rates. In 2024, the company retained 15.95K customers but churned 7,473. By 2025, the churn rate has become alarming, with 12K customers churned and only 3,629 retained.
- Product Performance**
Across all years, AOP (Adobe One Pro) has consistently been the top-selling product variant, generating the majority of revenue. Student versions and camera brand-specific versions contribute smaller portions to the overall revenue.

Revenue

These metrics provide a summary of Adobe One's performance, highlighting rapid growth from 2021 to 2023 but severe challenges in subsequent years. The dramatic decrease in revenue, high churn rates, declining ARPU, and low NRR in 2024 and 2025 suggest that the company is struggling to retain customers and maintain its previous growth trajectory. The business is in a critical situation and may need to reassess its strategy, particularly in customer retention, pricing, and product value proposition.

Comments & Insights:

- Product Performance**
Across all years, AOP (Adobe One Pro) has consistently been the top-selling product variant, generating the majority of revenue. Student versions and camera brand-specific versions contribute smaller portions to the overall revenue.
- ARPU (Average Revenue Per User)**
ARPU peaked in 2023 at 744.63 kr. It then declined sharply to 465.53 kr in 2024 and further down to 34.99 kr in 2025.
- Net Revenue Retention (NRR)**
NRR was extremely high in 2022 at 470.0% and 2023 at 183.2%, indicating strong growth and upselling. However, it dropped dramatically to 64.2% in 2024 and 3.7% in 2025, suggesting significant challenges in retaining customer value.
- New vs Existing Revenue**
The company shifted from being heavily reliant on new customer revenue in 2021-2022 to primarily generating revenue from existing customers in 2024-2025. This shift is driven by customer retention, pricing, and product value proposition.
